

INTERNSHIP ON

VIDEO
SHOOTING

& EDITING:

DEAR HOME-SCHOOLER,

Are you a homeschooler looking to gain valuable work experience and learn new skills? If so, we have an exciting opportunity for you! Our company is now offering on-job internships for homeschoolers.

During this internship, you will work alongside our experienced professionals and learn about the day-to-day operations of our business. You will be given meaningful tasks and responsibilities that will challenge and stretch your abilities, while providing you with a taste of what it's like to work in a professional environment.

Not only will you gain valuable work experience, but you'll also have the opportunity to network with professionals in your field of interest. This could be especially valuable for those of you who are considering pursuing a career in a specific field.

CONTACT US:  +91 9036744017

Our on-job internships are tailored to meet the individual needs and interests of each student. We understand that homeschoolers have unique educational backgrounds and goals, and we will work with you to ensure that your internship aligns with your interests and aspirations.

So if you're a home schooler who is looking to gain valuable work experience, develop new skills, and make meaningful connections in your field of interest, then we encourage you to apply for our on-job internship program today.

ABOUT INTERNSHIP

Our video shooting and editing Internship is designed to provide students with a comprehensive understanding of the video production process. Here's a breakdown of what the Internship would entail:

CONTACT US:  +91 9036744017  e-construct.in

INTRODUCTION TO VIDEO PRODUCTION:

Students will be introduced to the different components of video production, including pre-production, production, and post-production. They will learn about the different roles and responsibilities of the production team, as well as the tools and equipment used in video production.

CONTACT US:  +91 9036744017

 e-construct.in

CAMERA TECHNIQUES:

Students will learn about the different types of cameras and lenses, as well as the different shooting techniques used in video production. They will learn how to compose shots, frame subjects, and use lighting to create a desired mood or effect.

AUDIO RECORDING:

Students will learn about the importance of good audio in video production, and how to capture high-quality sound using microphones and other recording equipment. They will also learn how to mix and edit audio in post-production.

EDITING SOFTWARE:

Interns will be introduced to different video editing software, such as Adobe Premiere Pro and Final Cut Pro X. They will learn how to import and organize footage, create rough cuts, and add transitions and special effects.

POST-PRODUCTION:

Students will learn about the different stages of post-production, including editing, color grading, and sound mixing. They will learn how to export and deliver a final video product that meets industry standards.

PROJECT WORK:

Students will work on projects throughout the course, applying the techniques and concepts they've learned in a practical setting. They will work individually and in groups, and will receive feedback and critiques from their instructor and peers.

CAREER EXPLORATION:

Students will have the opportunity to explore different career paths within the video production industry and learn about the various roles and responsibilities of professionals in this field.

The specific topics and techniques covered in the course will depend on the needs and goals of the students. However, some examples of the topics that the students may learn include:

01 Camera settings and exposure

02 Lighting and colour temperature

03 Sound recording techniques

04 Colour grading and correction

05 Special effects and transitions

06 Exporting and delivering final video products

CONTACT US:  +91 9036744017
